### AMENDMENTS

#### In the claims:

Claim 1 (currently amended) An optical film attaching apparatus for attaching an optical film onto a substrate, the apparatus comprising:

a substrate conveyer for carrying and transporting ~~substrates~~ the substrate;

an optical film adsorber facing the substrate conveyer for carrying the optical ~~films~~ film;

an attaching device disposed along a conveying path of the ~~substrates~~ substrate for attaching the optical film to the substrate; and

a stop element, having a first idler, wherein the first idler disposed between the optical film adsorber and the attaching device to prevent an edge of the optical film from attaching to the substrate ahead of time.

Claim 2 (original) The optical film attaching apparatus of claim 1, wherein the substrate conveyer has a carrying surface, the optical film adsorber has an adsorbing surface such that the adsorbing surface faces the substrate conveyer, and the stop element is disposed between the carrying surface of the substrate conveyer and the adsorbing surface of the optical film adsorber.

Claim 3 (currently amended) The optical film attaching apparatus of claim 1,

Customer No.: 31561  
Application No.: 10/711,812  
Docket No.: 13723-US-PA

wherein the ~~stop element comprises an~~ first idler disposed ~~in parallel to~~ along the edges edge of the optical film.

Claim 4 (currently amended) The optical film attaching apparatus of claim 1, wherein the stop element further comprises a ~~plurality of idlers~~ second idler ~~arranged~~ disposed in parallel to along the edges edge of the optical film.

Claim 5 (original) The optical film attaching apparatus of claim 1, wherein the stop element is fabricated using steel.

Claim 6 (original) The optical film attaching apparatus of claim 1, wherein the optical film comprises a polarizer.

Claim 7 (currently amended) The optical film attaching apparatus of claim ~~[[6]]~~ 4, wherein the stop element further comprising a detaching film disposed on a surface of the ~~stop element~~ first idler and the second idler to prevent adhesion with a plastic layer on the polarizer.

Claim 8 (currently amended) The optical film attaching apparatus of claim 1, wherein the substrate conveyer ~~comprises~~ is a roller type conveyer or a chain conveyer.

Customer No.: 31561  
Application No.: 10/711,812  
Docket No.: 13723-US-PA

Claim 9 (original) The optical film attaching apparatus of claim 1, further comprising a dust-proof cover disposed between the optical film adsorber and the substrate conveyer.

Claim 10 (original) The optical film attaching apparatus of claim 1, wherein the attaching device comprises a group of driving rollers.

Claims 11-20 (cancelled)

Claim 21 (new) The optical film attaching apparatus of claim 1, wherein the optical film adsorber comprises an adsorbing element.

Claim 22 (new) The optical film attaching apparatus of claim 22, wherein the adsorbing element is an adsorption pad.
